Web Technologies: HTML5, CSS3, JavaScript

Core Concepts: Data Structures, Object-Oriented Programming, SQL, Computer Networks

Tools: GitHub, VS Code.

PROJECTS

Securing Real-Time Data using Blockchain and AI

- Developed a real-time data security framework using Blockchain and AI to ensure data integrity and tamper-proof storage.
- Implemented AI-based anomaly detection to identify malicious activities and abnormal patterns in live data streams.
- Evaluated system performance in terms of security, reliability, and real-time responsiveness.

Online Personal Data Markets with Reserve Price

- Designed an online personal data marketplace model allowing users to control data sharing through a reserve price mechanism.
 - Implemented pricing and allocation logic to ensure fair compensation, transparency, and privacy preservation.
 - Analyzed the impact of reserve pricing on buyer participation, market efficiency, and revenue optimization.
-
